E. V. Iarve and **N. J. Pagano**	1	Singular full-field stresses in composite laminates with open holes
A. Cecchi and **N. L. Rizzi**	29	Heterogeneous elastic solids: a mixed homogenization-rigidification technique
H. Liu, Z. K. Wang and **T. J. Wang**	37	Effect of initial stress on the propagation behavior of Love waves in a layered piezoelectric structure
H.-C. Tsai and **S.-J. Hsueh**	53	Mechanical properties of isolation bearings identified by a viscoelastic model
Y.-L. Chung and **C.-F. Pon**	75	Boundary element analysis of cracked film–substrate media
P. Poonsawat, A. C. Wijeyewickrema and **P. Karasudhi**	91	Singular stress fields of angle-ply and monoclinic bimaterial wedges
S. Roy and **W. Xu**	115	Modeling of diffusion in the presence of damage in polymer matrix composites
H. Ismar, F. Schröter and **F. Streicher**	127	Finite element analysis of damage evolution in Al/SiC composite laminates under cyclic thermomechanical loadings
P. Berbinau and **C. Soutis**	143	A new approach for solving mixed boundary value problems along holes in orthotropic plates
Y. X. Mukherjee and **S. Mukherjee**	161	Error analysis and adaptivity in three-dimensional linear elasticity by the usual and hypersingular boundary contour method
	179	Keywords

NUMBER 2

J. W. Ju and **L. Z. Sun**	183	Effective elastoplastic behavior of metal matrix composites containing randomly located aligned spheroidal inhomogeneities. Part I: micromechanics-based formulation
L. Z. Sun and **J. W. Ju**	203	Effective elastoplastic behavior of metal matrix composites containing randomly located aligned spheroidal Inhomogeneities. Part II: applications
S. M. Lin and **S. Y. Lee**	227	Closed-form solutions for dynamic analysis of extensional circular Timoshenko beams with general elastic boundary conditions

PII: S0020-7683(01)00227-X

Y. Y. Wang, K. Y. Lam and **G. R. Liu** 241 A strip element method for the transient analysis of symmetric laminated plates

T. X. Yu, J. L. Yang and **S. R. Reid** 261 Deformable body impact: dynamic plastic behaviour of a moving free–free beam striking the tip of a cantilever beam

C.-C. Chien and **T.-Y. Wu** 289 A particular integral BEM/time-discontinuous FEM methodology for solving 2-D elastodynamic problems

L. Bardella and **F. Genna** 307 Elastic design of syntactic foamed sandwiches obtained by filling of three-dimensional sandwich-fabric panels

K. Tunvisut, N. P. O'Dowd and **E. P. Busso** 335 Use of scaling functions to determine mechanical properties of thin coatings from microindentation tests

J. P. Bardet and **I. Vardoulakis** 353 The asymmetry of stress in granular media

R. Lipton 369 Effect of interfacial bonding on fiber reinforced shafts subject to antiplane shear

NUMBER 3

M. Mukherjee 389 Forced vertical vibrations of an elastic elliptic plate on an elastic half space – a direct approach using orthogonal polynomials

S. S. Lee 401 Boundary element analysis of singular hygrothermal stresses in a bonded viscoelastic thin film

F. Rooney and **M. Ferrari** 413 Tension, bending, and flexure of functionally graded cylinders

R. I. Más and **F. I. Más** 423 Biaxial bending–axial force elastic interaction diagrams in hollow steel sections

R. I. Más and **F. I. Más** 435 Shear–bending–torsion elastic interaction diagrams in circular steel sections

C. G. Koh and **H. L. Lim** 445 Analytical solution for compression stiffness of bonded rectangular layers

I. Elishakoff 457 Inverse buckling problem for inhomogeneous columns

P. Pedersen 465 On the influence of boundary conditions, Poisson's ratio and material non-linearity on the optimal shape

K. P. Soldatos and **S.-L. Liu** 479 On "The generalised plane strain deformations of thick anisotropic composite laminated plates"

S. S. Vel and **R. C. Batra** 483 Closure to "The generalized plane strain deformations of thick anisotropic composite laminated plates"

NUMBER 4

I. Carol, E. Rizzi and **K. Willam** 491 On the formulation of anisotropic elastic degradation. I. Theory based on a pseudo-logarithmic damage tensor rate

I. Carol, E. Rizzi and **K. Willam** 519 On the formulation of anisotropic elastic degradation. II. Generalized pseudo-Rankine model for tensile damage

A. Corigliano and **M. Ricci** 547 Rate-dependent interface models: formulation and numerical applications

E. Bellenger and **P. Bussy** 577 Phenomenological modeling and numerical simulation of different modes of creep damage evolution

M. Kamlah and **U. Böhle** 605 Finite element analysis of piezoceramic components taking into account ferroelectric hysteresis behavior

M. Brünig 635 Numerical analysis and large strain elastic–viscoplastic behavior of hydrostatic stress-sensitive metals

O. T. Bruhns, H. Xiao and **A. Meyers** 657 A self-consistent Eulerian rate type model for finite deformation elastoplasticity with isotropic damage

R. V. Craster and **D. P. Williams** 685 Pulse scattering by a subsurface semi-infinite crack

A. A. Cannarozzi and **F. Ubertini** 717 A mixed variational method for linear coupled thermoelastic analysis

NUMBER 5

R. Mao and **G. Lu** 741 Plastic buckling of circular cylindrical shells under combined in-plane loads

P. Redanz 759 A study of stresses in powder compacted components during and after ejection

F. Li and **Z. Li** 777 Continuum damage mechanics based modeling of fiber reinforced concrete in tension

D. M. Stump, A. R. Champneys and **G. H. M. van der Heijden** 795 The torsional buckling and writhing of a simply supported rod hanging under gravity

X. D. Wang 815 On the dynamic behaviour of interacting interfacial cracks in piezoelectric media

J. L. Bassani, A. Needleman and **E. Van der Giessen** 833 Plastic flow in a composite: a comparison of nonlocal continuum and discrete dislocation predictions

X.-L. Gao and **S. Mall** 855 Variational solution for a cracked mosaic model of woven fabric composites

H. K. Lee and **S. Simunovic** 875 A damage constitutive model of progressive debonding in aligned discontinuous fiber composites

G. N. Wells and **L. J. Sluys** 897 Three-dimensional embedded discontinuity model for brittle fracture

D. S. Sophianopoulos 915 Nonlinear stability of simplified structural models simulating elastic shell panels of revolution under step loading

S. Vigdergauz 8593 The effective properties of a perforated elastic plate Numerical optimization by genetic algorithm

C. M. Wang, Y. Xiang and **J. Chakrabarty** 8617 Elastic/plastic buckling of thick plates

X.-J. Zheng and **X. Wang** 8641 Analysis of magnetoelastic interaction of rectangular ferromagnetic plates with nonlinear magnetization

M. A. Qidwai, P. B. Entchev, D. C. Lagoudas and **V. G. DeGiorgi** 8653 Modeling of the thermomechanical behavior of porous shape memory alloys

B. Ya. Kantor, N. V. Smetankina and **A. N. Shupikov** 8673 Analysis of non-stationary temperature fields in laminated strips and plates

Z. M. Wang and **M. L. Peterson** 8685 Variational principles for softening gradient dependent plasticity

O. T. Bruhns, H. Xiao and **A. Meyers** 8701 Large simple shear and torsion problems in kinematic hardening elasto-plasticity with logarithmic rate

J. S. Kuang and **S. C. Ng** 8723 Dynamic coupling of asymmetric shear wall structures: an analytical solution

H. Fukunaga, N. Hu and **G. X. Ren** 8735 FEM modeling of adaptive composite structures using a reduced higher-order plate theory via penalty functions

R. Al-Khoury, C. Kasbergen, A. Scarpas and **J. Blaauwendraad** 8753 Spectral element technique for efficient parameter identification of layered media Part II: Inverse calculation

K. L. Chowdhury 8773 Constitutive equations for transversely isotropic elastic dielectrics with Schur's lemma

D. Chen, S. T. S. Al-Hassani, Z. Yin and **Y. Yu** 8787 Modeling shock loading behavior of concrete

P. Bisegna and **G. Caruso** 8805 Evaluation of higher-order theories of piezoelectric plates in bending and in stretching

R. Barsotti, S. S. Ligarò and **G. F. Royer-Carfagni** 8831 The web bridge

A. V. Metrikine, A. V. Vostrukhov and **A. C. W. M. Vrouwenvelder** 8851 Drag experienced by a high-speed train due to excitation of ground vibrations

L. Sun 8869 Dynamic displacement response of beam-type structures to moving line loads

S. Cui, H. Hao and **H. K. Cheong** 8879 Dynamic buckling and post-buckling of imperfect columns under fluid–solid interaction

P. Villaggio 8899 How to design a foundation

W. Wang, H. Ishikawa and **H. Yuki** 8907 An inverse method for determining material properties of a multi-layer medium by boundary element method

Y. C. Gao and **Z. Zhou** 8921 Large strain contact of a rubber wedge with a rigid notch

L. Kaishin and **L. Bin** 8929 A numerical solution of torsional stress wave propagation in layered orthotropic bar of rectangular cross-section
